**UNITED STATES CELLULAR CORPORATION
QUARTERLY E911 IMPLEMENTATION REPORT**

United States Cellular Corporation ("USCC"), by its undersigned attorneys, hereby submits its ninth quarterly E911 implementation report pursuant to the Commission's order staying certain E911 phase II deadlines for many non-nationwide wireless carriers.¹

I. Introduction

USCC is a Tier II carrier under the *Order to Stay* issued by the Commission in 2002.² As a wireless carrier with systems serving many small markets, USCC faces particular challenges in upgrading its technology and interacting with a wide variety of PSAPs across its service area. To meet these challenges, USCC has dedicated substantial financial and personnel resources to accelerate the deployment of E911 service throughout its service area.

USCC personnel are in regular communication with PSAPs that are at varying levels of readiness in the provision of E911 service. In addition, USCC closely monitors its

¹ See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadlines for Non-Nationwide CMRS Carriers*, Order to Stay, 17 FCC Rcd 14841 (2002) ("*Order to Stay*").

² *Id.* ¶ 23.

E911 vendors to ensure the progress of E911 deployment to all requesting PSAPs. In the past quarter, USCC successfully completed its four-year, multimillion dollar project that converted all of its TDMA markets to CDMA. In addition, during the past quarter, USCC built-out its newly acquired markets in St. Clair County, Illinois and deployed phase I and phase II service to all of the requesting PSAPs serving that market. USCC also rolled-out phase II service for the first time to PSAPs in Kansas and Oregon. USCC continues to be proactive with the PSAPs in its service area to ensure prompt roll-out as the PSAPs become ready and able to utilize the phase I and phase II E911 information.

II. Status of Phase I Requests

USCC and its E911 vendor, TeleCommunication Systems, Inc. ("TCS"), actively work with all requesting PSAPs to deploy phase I E911 service throughout USCC's service area. In numerous cases, USCC has proceeded with deployment despite the fact that a particular PSAP request does not amount to a valid request for service under the Commission's rules, including in some markets where the PSAP made only an oral request. In addition, in USCC's newly-acquired markets, USCC has proceeded with phase I or phase II roll-out to the entire market despite the fact that in some cases USCC received no formal request from a particular PSAP within that market.

To date, USCC has received 738 requests for phase I service and successfully deployed phase I service to 695 PSAPs. This represents a 94 percent deployment rate and an additional 83 PSAPs for which phase I service was deployed in this quarter. Of the remaining 43 outstanding phase I requests, ten have been pending less than six months. Attached as Appendix A is a spreadsheet identifying those PSAPs requesting phase I service and the markets in which USCC has deployed phase I.

USCC has 33 PSAP requests for phase I service that have been pending for more than six months. USCC maintains regular contact with PSAPs in all of these markets and has reached an agreement with each PSAP to delay the phase I roll-out. In these cases, phase I deployment has been delayed due to circumstances beyond USCC's control. Specifically, ten PSAPs in Oregon have experienced delays related to installation of trunks from the LEC, and 18 PSAPs serving Milwaukee, Wisconsin have experienced delays because they did not have the appropriate equipment to receive and implement phase I service. In North Carolina, the phase I roll-out has been delayed for two PSAPs because they are not ready for drive testing and for one additional PSAP due to budgetary concerns related to its use of a stand-alone ALI database. One market in Indiana has experienced a delay because the PSAP lacks the appropriate equipment, and phase I roll-out is delayed for one market in Virginia due to ALI database connectivity issues. USCC has extension agreements with each of the 33 PSAPs in these markets. In all of these cases, USCC is ready to drive-test as soon as the PSAP and/or the LEC resolve any remaining obstacles.

III. Status of Phase II Requests

USCC continues to deploy phase II E911 service as required by the Commission's rules and its *Order to Stay*. To date, USCC has received 353 PSAP requests for phase II service. USCC has successfully deployed phase II E911 service to 257 PSAPs in its service area, an increase of 72 PSAPs for which phase II service was deployed in this quarter. USCC currently has 96 outstanding PSAP requests for phase II service. Of these outstanding requests, 57 have been pending less than six months. The attached spreadsheet identifies those PSAPs requesting phase II service and the markets where USCC has deployed phase II.

USCC has 39 phase II requests that have been pending more than six months. Delays for 34 of these PSAPs have been due to circumstances beyond USCC's control, and USCC has obtained agreements from these PSAPs to delay roll-out. For 15 of these PSAPs serving Iowa markets, phase II roll-out has been delayed due to technical difficulties associated with the mobile switching center (MSC). For 13 PSAPs serving Cook County, Illinois, deployment has been delayed due to PSAP readiness issues. Lack of PSAP equipment also is the reason for delayed phase II roll-out in three markets in North Carolina, and one market each in Indiana, Wisconsin and West Virginia. In all of these markets, the requesting PSAP has granted USCC an extension whereby USCC agrees to deploy phase II service within 60 days of the PSAP notifying USCC of its readiness. In these cases, USCC and its vendors have completed all the necessary steps toward phase II deployment and are waiting for the PSAPs to make the necessary corrections to or upgrade their systems.

For the remaining five PSAPs with phase II requests pending more than six months, the roll-out delays have been due to lost original request letters apparently sent to USCC. All five of these requests are from North Central West Virginia MECCA 9-1-1. The current targeted deployment date for these five PSAPs is November 12, 2004. USCC has been in regular contact with MECCA 9-1-1 to inform them of USCC's efforts to expedite phase II deployment to these five PSAPs, and MECCA 9-1-1 has been agreeable to USCC's deployment plan.

In CDMA jurisdictions where new phase II requests have been received, USCC continues the process of installing necessary software loads on its switches to provide phase II service and upgrading all the trunking between these switches and the Mobile Positioning Center of its E911 vendor, TCS. USCC and TCS continually integrate the CDMA switches serving

these new phase II markets with the TCS equipment and the phase II software. USCC is also continually updating the Base Station Almanac (BSA) for all its cell sites serving CDMA markets where it has received a phase II request. The BSA helps to improve the accuracy of location information provided to PSAPs.

As noted in earlier quarterly reports, USCC has contracted with Marconi Corporation to do the necessary calibration, accuracy and drive testing to ensure that USCC's phase II service meets the Commission's accuracy requirements. Marconi has conducted testing on USCC's CDMA switches that are serving PSAPs with live phase II deployments. These tests have been conducted using the CDMA location-capable mobile phones currently available to USCC's customers. Marconi's accuracy test results confirm that USCC is meeting the Commission's requirement that 67 percent of the calls are accurate to within 50 meters and 95 percent of the calls are accurate to within 150 meters.³ Marconi performs a complete accuracy test every six months on every USCC switch where it has deployed phase II.

IV. Status of Handset Deployment

USCC remains in substantial compliance with the applicable handset deployment benchmarks.⁴ In its ongoing efforts to increase penetration rates of GPS-enabled phones, USCC has pulled back all non-E911 enabled phones still in inventory at all of its retail locations in CDMA markets as of May 2004. USCC continues to track its sales of GPS-enabled phones in order to ensure compliance with the penetration benchmarks in the Commission's *Order to Stay*. In September 2004, over 99.4 percent of the total handsets sold by USCC had E911 capability.

³ 47 C.F.R. § 20.18(h).

⁴ See *Order to Stay* ¶ 27.

This represents substantial compliance with the Commission's May 31, 2004 deployment benchmark that 100 percent of new activations be GPS-enabled handsets.

Currently, USCC has 13 GPS-enabled handsets available for sale in its CDMA markets: Kyocera KE-434, Kyocera KE-414, Kyocera SE-47 (to be replaced by the Kyocera SE-44 upon inventory completion), Kyocera 7135, Nokia 6585, LG VX-4400, LG VX-6000, LG VX-5550, Motorola C343, Motorola T731, Motorola 810, Audiovox CDM-8900, and Audiovox CDM-8410. USCC no longer places any purchase orders for non-E911 capable CDMA handsets nor does it restock non-E911 capable CDMA handsets sold at USCC's retail locations.

V. Conclusion

As demonstrated above, USCC continues to make significant progress in deploying E911 phase I and phase II service throughout its service area. The commitment of significant financial and personnel resources has enabled USCC to move closer to its goal of meeting or exceeding the Commission's implementation deadlines for E911 deployment.

Respectfully submitted,

UNITED STATES CELLULAR
CORPORATION
